

NEW! Elacin Music-series | Elacin ER20 XS

Especially for

- Musicians
- Sound crews
- DJs
- Visitors to clubs and cafés
- Visitors to rock concerts and dance events
- People who travel regularly by plane or train

The Elacin ER20 XS are especially for occasional use and are not custom-made. These earplugs are much more comfortable to wear than conventional disposable or pre-shaped earplugs.

They Elacin ER20 XS wear discreetly in the ear canal and have - unlike the ER20 small and medium - no protruding parts. This feature makes it particularly comfortable to wear these hearing protectors under e.g. headphones. They come with a small, flexible grip that allows easy insertion into and removal from the hearing canal.

The Elacin ER20 XS is the ideal intermediate step for anyone who wants to make the move from conventional earplugs to custom-made products with optimal sound enjoyment.

Colour

The ER20 XS is grey as standard.

Material

The part of the ER20 XS which enters the ear is made from soft silicone flanges. The Elacin ER20 XS is supplied with a neck cord as standard.

Benefits

- Unsurpassed clarity
- Good protection against high noise exposure
- Reusable
- Soft and comfortable
- Quick and easy to clean
- With neck cord
- Attractively priced
