

## Shokz OpenComm 2 Industrial Version Free to Move. Seamless to Connect.

### Enhancing Industrial Communication and Safety with Elacin and Shokz OpenComm2

Revolutionize communication and safety in industrial environments with Elacin Hearing Protection, now enhanced by the robust capabilities of Shokz OpenComm2.

Elacin Hearing Protection seamlessly integrates with the powerful features of Shokz OpenComm2, designed specifically for high-noise, industrial environments. Unlike standard workplace communication solutions, this collaboration is engineered to ensure clear, reliable communication without compromising on hearing protection. While typical headsets may isolate you from your surroundings, the Open-Ear Design of the OpenComm2 ensures you stay alert and aware of potential hazards, while still benefiting from crystal-clear calls and easy connectivity.

Featuring 7th generation bone conduction technology and Bluetooth 5.1, OpenComm2 provides a significant upgrade for industrial workers who need communication without sacrificing safety or comfort. The specialized noise-canceling microphone and optimized acoustics for industrial environments ensure that your voice is heard clearly, even in the noisiest factory floors or construction sites.

Elevate your industrial workspace – where Elacin meets Shokz, offering clarity, protection, and awareness where you need it most.
